

**“It seems to me that the Focus on Africa program was mounted with a great deal of imagination and vision.”**

*Dr. Richard Leakey, former Director of Kenya Wildlife Service*

***On Safari***, published by Focus on Africa Publications, combines the information found in a comprehensive travel guidebook with the visual presentation of a coffee table-style book. Designed by the internationally recognized, Alyson LeBlanc, this ultra suede and gold-stamped hardbound book is 8.5” x 12” landscape format and contains 1,065 stunning color photographs that will please, excite, and move you to explore the “Dark Continent.”

Most of the photographs were taken during the Focus on Africa '04 project when 142 photographers traveled to ten countries to visually capture the magic of an African safari.

Safari expert David Anderson, a veteran of 80 safaris, and Carrie Hampton, co-wrote ***On Safari***. Cristine Mittermeier, of Conservation International, wrote the introduction.

When you have turned the last page of this 560-page masterpiece, you will long for more. Therefore, the publishers have created a companion web site, [www.onsafari.info](http://www.onsafari.info), that will provide the most accurate information to be found on African safaris on Planet Earth.
