

About the African Serengeti

Serengeti means "endless plains" in the Maasai language.

The Serengeti is a place of vastness and breathtaking beauty.

"Each year more than two million wildebeest and over one-quarter of a million zebra travel from the Serengeti to Kenya in search of fresh grasses.

"Paleoanthropologists believe that man first walked upright in East Africa. There is something very spiritual about being in your own private luxury mobile tented camp looking at the starlit heavens knowing that you are standing in the cradle of mankind.

"If the industrialized nations do not develop a plan to start using the earth's resources at sustainable levels, within the next thousand years, all of the modern societies will collapse and the last Homo sapiens left on our planet will live in Africa in cooperation with nature as in the beginning."
